The Built Environment Commitment
Delivering low carbon and resource efficiency

“We commit to take action that contributes to a low carbon, resource efficient built environment”

In delivering our commitment we will:

Materials
Decrease the amount of all site waste arising from our direct operations and increase the recycling rate from waste arisings
- Waste generated: 7 tonne per £100,000 of turnover
- Recycling rate: 97% from direct waste removed from site

Water
Reduce the amount of water used in our operations
- 5 m³ per £100,000 of turnover

Energy
Reduce the amount of energy used, from direct generation and through onsite fossil fuels
- 720 kg per £100,000 of turnover

Commercial vehicle movements
Reduce the number of commercial deliveries to operational sites
- 10 no per £100,000 of turnover
