The Built Environment Commitment
Delivering low carbon and resource efficiency

“We are aware of the essential role we play, as a business, in tackling environmental, economic and social challenges. We believe that mobilising the innovation, talent and productive capacities at Sheppard Robson will accelerate our move to a more sustainable, resource efficient and low carbon built environment”

In delivering our commitment we will aim to:

- **Carbon**: reduce our operational carbon by 5% annually from the 2014-15 figure.
